WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US04/24550

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims 1-18	YES
	Claims NONE	NO
Inventive step (IS)	Claims 1-18	YES
	Claims NONE	NO
Industrial applicability (IA)	Claims 1-18	YES
	Claims NONE	NO

2. Citations and explanations:

Claims 1-18 meet the criteria set out in PCT Article 33(2) and (3), because the prior art does not teach or fairly suggest the claimed invention (i.e., a method of inhibiting the growth of cells in a blood vessel (e.g., coronary artery, vein graft or peripheral artery) by contacting said cells with a halichondrin analog.

US 6,689,803 (HUNTER) teach a method and compositions for treating or prevention inflammatory diseases such as multiple sclerosis using an anti-microtubules agent (e.g. halichondrin B). However, it fails to teach blood vessel cell growth inhibition. Thus, the claimed invention is considered to be novel and patentable over the prior art of the record.

Claims 1-18 meet the criteria set out in PCT Article 33(4), and thus the claimed invention improves industrial applicability because the subject matter claimed can be made or used in industry.
